ELECTRIC BIKE LIFT

BIKE LIFT

Get the most out of your mobility and freedom with the electric Bike Lift.

The patented 'Bike Lift' is the smartest and most innovative bike-carrier on the market. Planning to hit the road in your motorhome? Witness the perfect solution for bringing along your bikes and taking them anywhere you want!

-  An **integrated 12V motor** with switch or **remote control** (as option) moves the bikes up and down.
-  The platform of the Bike Lift can bridge a 110cm height distance. The bikes can be **lowered to almost ground level** on most vehicles.
-  No need to lift the bikes yourself. Installing the bikes on the platform is far **more comfortable when they are closer to the ground**.
-  The **maximum load is 60 kg**, making it perfectly suitable for 2 E-bikes or 3 standard bikes.

Characteristics

1 Adjustable mounting points

Allows an installation on different types of vehicles. The Bike Lift can even be mounted on standard fixation points or replace a standard rack.

2 12V Motor

The motor lifts the bikes up without any human effort. You can even adjust to the perfect lowest position of the Bike Lift.

3 Double safety lock

A manual circuit breaker and axle for mechanical locking prevents unwanted lowering of the Bike Lift while driving the vehicle.

5 Platform holder

The platform can be folded easily and securely to ensure optimal and safe driving or when the Bike Lift is not in use.

7 Adaptable bike holder

The bike holders are adjustable to every bike frame. They are even lockable with our optional accessory.

4 Smart platform lock

The sturdy smart platform locking system prevents that the platform jumps up during driving.

6 Adjustable wheel holders

Choose the position of the wheel holders and fasten the bikes securely with the integrated wheel straps.

8 Manual override system

A power outage can't stop you enjoying your bikes! The standard supplied crank makes it possible to bring the platform down.

Models
